## EDUCATION

---

**Manipal Institute of Technology, Manipal**  
Bachelor in Technology  
Department of Computer Science and Engineering.

August 2016 - June 2020

CGPA: 9.22/10.0

## WORK EXPERIENCE

---

**MILA, Montreal**  
*Research Intern*

Aug 2020-Present

- Working with [Anirudh Goyal](#) on topics including sparsity and modularity in deep learning.
- Working on a project to induce structural rules from data and learning to apply them based on relevance.

**Indian Institute of Science, Bangalore**  
*Research Intern*

Jan 2020 - July 2020

- Working under the guidance of [Professor Aditya Gopalan](#) and [Professor Himanshu Tyagi](#) on using Machine Learning for air quality prediction from sensor data.
- Implemented pipelines for cleaning the raw data obtained from sensors.
- Implemented various algorithms such as MLP regression, linear regression, etc. for predicting the concentration of pollutants.
- Created a library that contained implementations for the various algorithms and data processing pipelines. The library was implemented in a modular fashion such that new algorithms could easily be implemented and different variations of hyperparameters could easily be tested.

**Google Summer of Code** [[Report](#)] [[Evaluation Comments](#)]  
*Student Developer*

May 2019 - August 2019

- Worked on building Recurrent Neural Network support for [ChainerX](#).
- Implemented the forward and backward passes of the following models - **UNI/BI-LSTM**, **UNI/BI-GRU**, **UNI/BI-Vanilla RNN**, **S-LSTM**, **Tree-LSTM** in C++.
- Implemented both the CPU and GPU versions of the models. Learnt to use the **CUDNN** framework provided by NVIDIA to implement the GPU versions of the above models.

**MIDAS Lab, IIIT Delhi**  
*Research Intern*

April 2019 - Present

- Working with [Professor Rajiv Ratn Shah](#) of IIIT Delhi on research problems in the domain of deep learning and natural language processing.
- Worked on detecting hate speech in Arabic using the linguistic cues combined with the social interaction between the users. This project has led to accepted papers at **ACL-SRW 2019** and **ACM-HyperText 2019**.
- Worked on a project to show improvements caused by **mixup**(a data augmentation technique) on NLP and Speech tasks. Papers published at **Coling 2020** and **Interspeech 2020**.

**Ubisoft**  
*Automation Intern*

May 2019 - July 2019

- Worked on detecting **UI bugs** such as when the car passes through a visible obstacle such as wall, tree, fence etc. in the crew 2 game.
- Used a combination of depth estimation and semantic segmentation using deep learning techniques to solve the problem.
- My solution had an accuracy of about 85% and it eliminated the need for manual detection of bugs.

AI Researcher

- Implemented reinforcement learning algorithms - **DQN**, **policy gradients**, and **A3C** on the environments provided by OpenAI gym such as the gym-minigrid environment.
- Mentored 3 juniors for the task of designing a learning algorithm for the udacity self-driving car simulator.

**Rammer.ai**

June 2018 - July 2018

Data Science Intern

- Worked on the task of detecting **action-items** in meeting transcripts and natural language inference on the SNLI Dataset.
- Learnt how to work with text data using libraries such as spacy, NLTK. Implemented a number of deep learning models for extracting features from text data which include LSTM, GRU, transformers etc.

**PUBLICATIONS**

- 
- **SpeechMix - Augmenting Deep Sound Recognition using Hidden Space Interpolations** [[code](#)]  
*Conference of the International Speech Communication Association INTERSPEECH 2020*  
Amit Jindal\*, Narayanan Elavathur Ranganatha\*, **Aniket Didolkar\***, Arijit Ghosh Chowdhury\*, Ramit Sawhney, Rajiv Ratn Shah, Di Jin.
  - **Augmenting NLP models using Latent Feature Interpolations**  
*International Conference on Computational Linguistics COLING 2020* Amit Jindal\*, **Aniket Didolkar\***, Arijit Ghosh Chowdhury\*, Ramit Sawhney, Rajiv Ratn Shah.
  - **Beyond Hostile Linguistic Cues: The Gravity of Online Milieu for Hate Speech Detection in Arabic** [[pdf](#)]  
*Proceedings of the 30th ACM Conference on Hypertext and Social Media ACM-HyperText 2019*  
**Aniket Didolkar**, Arijit Ghosh Chowdhury, Ramit Sawhney, Rajiv Ratn Shah.
  - **ARHNet-Leveraging Community Interaction for Detection of Religious Hate Speech in Arabic** [[pdf](#)]  
*Proceedings of the 57th Conference of the Association for Computational Linguistics: Student Research Workshop ACL-SRW 2019*  
**Aniket Didolkar**, Arijit Ghosh Chowdhury, Ramit Sawhney, Rajiv Ratn Shah.
  - **[Re] h-detach: Modifying the LSTM Gradient Towards Better Optimization** [[pdf](#)] [[code](#)]  
Paper accepted as part of the **ICLR reproducibility challenge 2019**  
**Aniket Didolkar**

**PROJECTS**

- 
- **Implementation of the paper - Recurrent Independent Mechanisms** [[code](#)] [**50+ stars**]  
Implemented the model presented in the paper - Recurrent Independent Mechanisms(RIMs). Reproduced the results for the MNIST task in the paper and extended the framework to report results on the gym-minigrid environment using proximal policy optimization.  
Was able to demonstrate that RIMs generalize better to different environments by showing their improvements over LSTMs.
  - **BERT Baselines for COQA** [[code](#)]  
Implemented BERT and its variants for the reading comprehension task of the COQA dataset.
  - **Parallel implementation of T-SNE** [[code](#)]  
Implemented a parallel version of the T-SNE algorithm using CUDA.
  - **Pruning Neural Networks** [[code](#)]  
Performed weight pruning and unit pruning on a simple fully-connected neural network. Showed that up to **90%** of the weights can be pruned without a considerable drop in accuracy. Also utilized the sparsity to speed up inference by upto **30%**.
  - **DeepJava** [[code](#)]  
Deep learning operations developed from scratch in Java. It builds a computation graph and correctly handles backpropagation for the defined operations (conv layer, fc layer, sigmoid layer etc.).

**TECHNICAL STRENGTHS**

**Libraries and Frameworks**  
Software

PyTorch, Tensorflow, Chainer, Numpy, CUDA, CUDNN  
Linux , Windows, Latex
